IE University students at their graduation ceremony on the Segovia campus

At IE University we strive every day to foster positive change through education, research and innovation.

We know that change is the only constant and education is the key to progress and moving society forward. Every year we train over 8,000 students from 140 countries at our Madrid and Segovia campuses, on undergraduate, master's and executive education programs. Our aim is to give them a robust profile, fast-track their professional careers and transform them into the leaders of tomorrow. Our platform of over 75,000 alumni in 185 countries supports us in this goal. These executives have a global profile, an innovative and entrepreneurial mindset, and an appreciation of the Humanities. They are responsible citizens, who are committed to having a positive impact on society and the planet.

As we look to the future, we are gearing up to celebrate The Next 50 to understand what society will face in the coming decades in relation to education, technology, global governance, and sustainability, among other fields, and to prepare for the challenges that will mark our lives and the new world of work. As we continue to navigate the challenges ahead, we invite you to join us on this exciting journey toward a brighter tomorrow.

Students at the IE Tower

HOW IT ALL BEGAN...

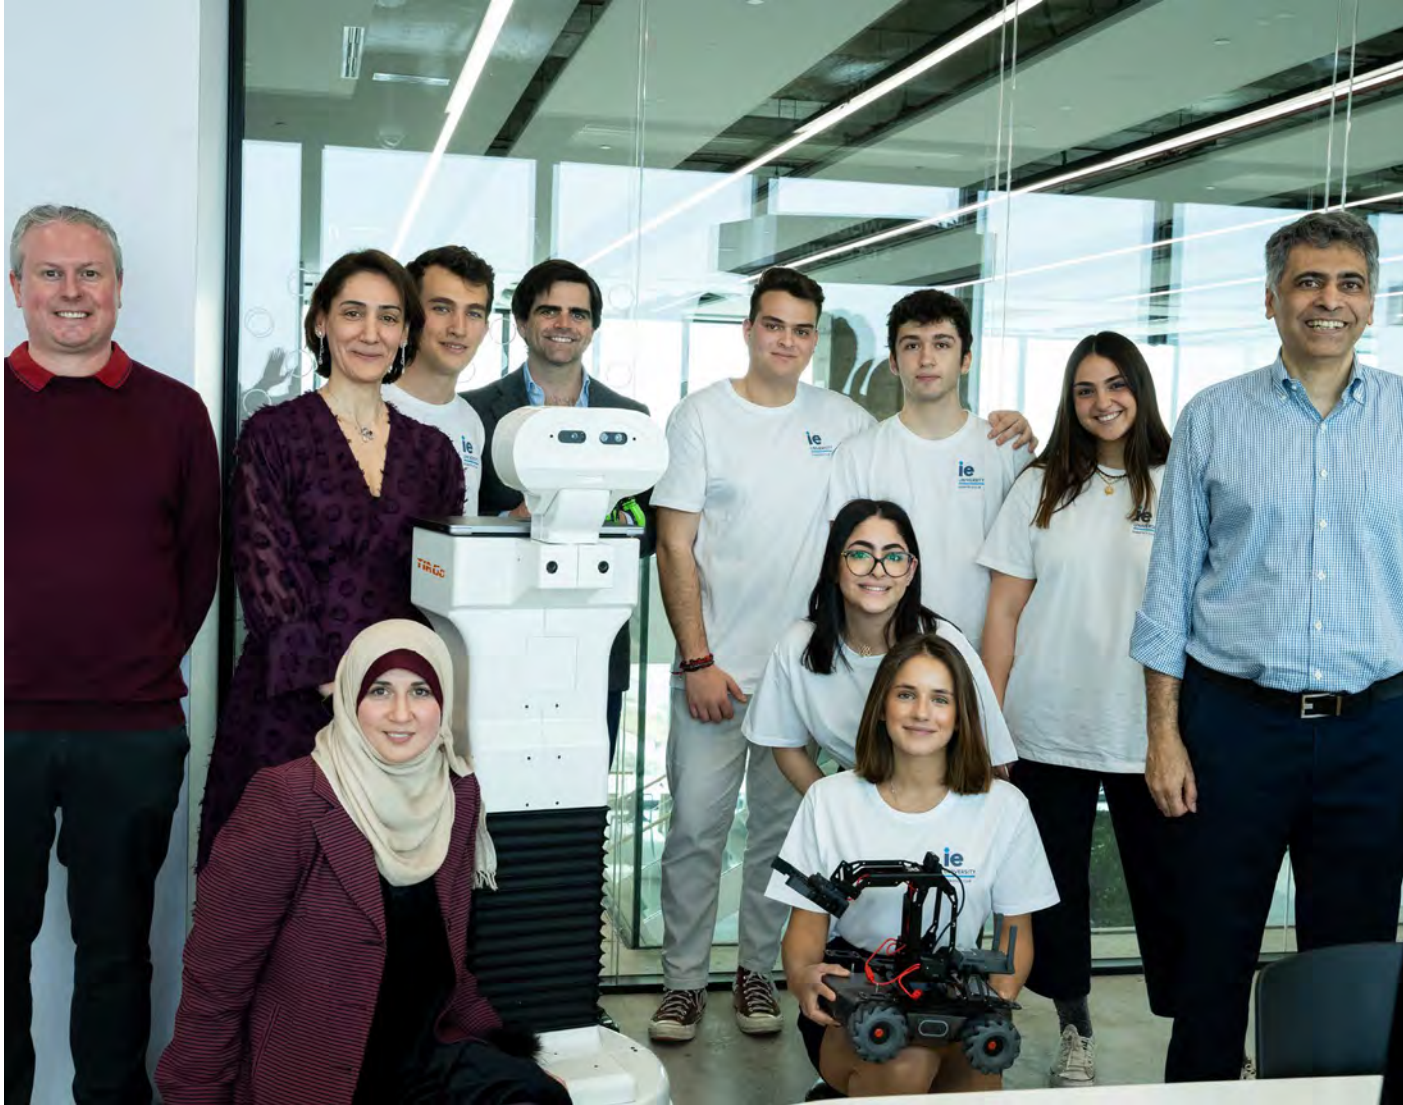

20th century

IE University opened its doors in 1973 in the heart of Madrid's financial district, offering an MBA program and a Master's in Law and Finance. In line with the philosophy of its founders, IE University, known at that time as Instituto de Empresa, soon launched its Entrepreneurship Center, as well as its Alumni Association. In order to foster fundraising, develop scholarships, and promote research, next came the IE International Advisory Board, the IE Foundation, and the US-based IE Fund. Working closely with the business ecosystem, IE University then launched the Business Leadership Forum as a platform for key international players to connect with business leaders to analyze political and economic trends and examine the challenges facing the corporate world. By the end of the century, IE University had embarked on strategic expansion, opening offices around the world.

21st century

The new millennium brought a more extensive portfolio, including our first digital programs. We were pioneers in Europe with the launch of the first online master's degree. In 2001, IE University led the creation of the Sumaq Alliance, a platform for the delivery of executive education programs by leading business schools and universities in Spain and Latin America. Years later, we joined forces with the Financial Times to launch Headspring, a joint venture for custom executive education programs to help transform global organizations. We also signed agreements with prestigious institutions like Northwestern University and Brown University to provide joint programs.

IE University started as a business school. After several decades, in keeping with our innovative approach, we extended our model to undergraduate

Robots designed at the IE School of Science and Technology's Robotics and AI Lab

programs. Currently, we have students from more than 140 countries on campus and we deliver bachelor and master's degrees, as well as executive education programs across our five schools: IE Business School, IE Law School, IE School of Architecture and Design, IE School of Science and Technology, and IE School of Politics, Economics and Global Affairs.

IE University offers programs in fields that include business, finance, law, global and public affairs, architecture and design, big data and technology, communication and media, and human behavior, among others. Our institution has offices in 28 countries and runs programs in Madrid, Segovia, London, Cape Town, San Francisco, Los Angeles, Providence, Sao Paulo, Singapore, and Shanghai.

Our faculty teaches students from more than 140 countries, generating knowledge and developing

research projects with social impact. With more than 75,000 alumni from 182 countries, our graduates are leaders with strong international profiles and the best ambassadors of our institution around the world.

IE University has over 20 years of experience in online training. The organization was a pioneer in Europe in the design of online master's programs and is rated as one of the most innovative universities in the world in international rankings. In 2020, IE University launched the Liquid Learning model, as its strategic commitment to transforming the educational experience. Today, IE is developing immersive learning environments, working on Artificial Intelligence projects, and designing content with VR and AR. It participates in metaverses such as Roblox and Decentraland and has launched the IE Metaverse Center and the Robotics and AI Lab, among many other initiatives.

OUR VALUES

These are the values that make up our DNA and define who we are.

Technology and innovation

IE University is committed to technological immersion in both education and the business world. We empower leaders to take up the challenges of innovation and digital transformation, creating new technologies and business models along the way. Our alumni are prepared to lead the world in continuous technological advancement.

IE University is a pioneer in maximizing the potential of technology applied to the learning experience. The Financial Times Online MBA Ranking 2023 places IE Business School's Global Online MBA program No. 1 worldwide, further consolidating IE University's international position as an international reference and a leader in online education. The academic institution, with more than 20 years of experience in the design of online Masters, is considered a pioneer in Europe

and is recognized as one of the most innovative universities in the world in international rankings.

IE University presented recently its AI Manifesto on the opportunities and challenges posed by generative Artificial Intelligence. This Manifesto, which will continue to evolve as the technology develops, highlights the main programs, initiatives, and research projects developed by IE University to enrich the learning experience of students, foster critical thinking, and encourage a human-centered approach to innovation.

IE University provides VR and glasses to all its students, reflecting its commitment to immersive methodologies. IE University designs campuses in several metaverses such as Roblox and Decentraland. In addition, IE University and Elysium Ventures, a Silicon Valley-based technology investment fund, have joined forces to create the IE Metaverse Center, the first research and innovation center in the metaverse.

Diego del Alcázar Benjumea, CEO de IE University

Entrepreneurial character

Entrepreneurship is in our DNA. IE University was established in 1973 by and for entrepreneurs. We have striven to promote an entrepreneurial ecosystem for the last five decades, boosting intrapreneurship, and supporting students and graduates in the creation and development of start-ups worldwide.

In our eyes, entrepreneurship is not just something you learn, it is something you live. Entrepreneurship is not only about creating new business models, it is about tackling new challenges, and forming new realities.

Humanities to understand the world

IE University values the study of Humanities as a key element to understanding the realities of our world, facilitating a long-term strategic global vision, and encouraging critical thinking. We believe that professional growth can only be achieved if it goes hand in hand with personal growth.

The study of Humanities enables us to challenge established concepts because it exposes us to new opportunities and different, perhaps better, solutions. It opens us up to new ideas, diverse cultures, and a myriad of languages. Studying the Humanities gives students access to a deeper understanding and to reach beyond the obvious.

IE University believes that the Humanities embody our way of being, the way we value life, and the way we observe reality. The Humanities give the IE community greater insight and enable it to envision new futures, playing an essential role in developing the full potential of our students.

Diverse ecosystem

IE University promotes diversity to ensure a unique learning experience, enriched by the contributions of students from around the world. Freedom and respect for diversity are core values of our identity. Our students are free to express themselves and be true to their own unique identities.

Our commitment to diversity has enabled us to attract students, graduates, and professors from more than 160 countries, creating an ecosystem that is rich in perspectives and ideas. We believe that it is these differences that help our community to grow.

The IE community is made up of people of different origins, genders, ethnicities, religions, beliefs, backgrounds, and objectives. It is a network that

extends to a multitude of countries, communities, and industries. We understand that diversity is not merely international multiculturalism, it is the sum of different experiences, expectations, and ways of thinking.

At IE University, we respect diversity in all its forms. We firmly believe that it enriches the learning environment for each and every student.

At IE University we firmly believe that in order to empower women across the globe, the best way is through education. More women in the classroom means more women in top positions, as entrepreneurs and investors, and important decision-makers in the global sphere. If we can inspire this trend within IE, we can pass it on to future generations. The IE Women initiative has flourished thanks to the work of the IE University faculty, researchers, student clubs, alumni and staff in designing the best possible tools to attract and retain female talent, to further understand what holds women back and together find the best paths to inspire confidence and advance women in their pursuit of success.

IE University is one of the first 'carbon neutral' universities in Europe

SUSTAINABLE MINDSET

We work to place sustainability at the center of all aspects of our institution. This involves rethinking the curriculum, campus operations, and organizational culture. We want to inspire people around the world to change their habits and make a positive impact on the world, and therefore this change must begin with us: IE University staff, faculty, students, and alumni.

The IE University Sustainability Office works to promote environmental and social policies, teaching and research, knowledge generation, governance of sustainability policies, awareness campaigns, and other initiatives.

At IE University, we have thought extensively about what the future will look like and what kind of education our students should receive so they can thrive in it. Our values come from a belief that we can use innovation and technology to break down boundaries in a way that can be of benefit to people all over the world. We are committed to sustainability and have adapted our education model at all levels to help people think and behave

in ways that foster a more sustainable planet through global citizenship, recycling, climate change, biodiversity, renewable energy, and social responsibility.

IE University is one of the first 'carbon neutral' universities in Europe. It has neutralized its carbon footprint, thus boosting its commitment to protecting the planet in line with the United Nations' Sustainable Development Goals. The organization has reduced its Scope 1 and Scope 2 CO₂ equivalent emissions by 50% per square meter of campus. Its emissions, electricity consumption and GHGs have been offset by the purchase of VCS-CCBS certified credits in the Alto de Huayabamba region of the Peruvian Amazon and reforestation projects in Spain.

Its recognition as a 'carbon neutral' organization is part of IE University's '10 Year Challenge', a strategic project that sets annual milestones to promote sustainability throughout IE between 2020 and 2030.

IE School of Politics, Economics and Global Affairs trains the next generation of global leaders in government, international organizations, corporations and civil society

SCHOOLS

IE Business School

IE Business School shapes leaders who drive innovation and change in organizations. Recognized in international rankings as one of the top business schools in the world, IE Business School has an urban campus in Madrid, complemented by offices across five continents. Our faculty currently teach students from 140 countries at graduate and post-graduate level, as well as delivering a master's in Management and in Finance, MBAs, Executive MBAs, doctoral, and Executive Education programs.

IE Business School has recently launched 'Next Best You', a new educational paradigm focused on creating profoundly transformational experiences for every student. The school serves as a curator actively devoted to helping students discover and pursue the next best version of themselves with the goal of preparing them for successful and responsible business careers. Next Best You is based on three strategic cornerstones: Your Career, Your Impact, and Your Purpose.

www.ie.edu/business-school/

IE School of Politics, Economics and Global Affairs

IE School of Politics, Economics and Global Affairs equips professionals to understand complex global affairs, manage organizations and occupy leading positions in international entities in the private, public, and not-for-profit sectors. IE School of Politics, Economics and Global Affairs is a full member of APSIA, the Association of Professional Schools of International Affairs, a platform for the exchange of knowledge in the field of international relations, whose members include Harvard, Princeton, Yale, Columbia, and Sciences Po. IE School of Politics, Economics and Global Affairs is the only school in Spain, and one of seven in Europe, to belong to this global, elite organization.

<https://www.ie.edu/school-politics-economics-global-affairs/>

IE Law School

IE Law School is recognized around the world for the high standards of the lawyers and legal consultants it trains, all with an international profile. IE Law School offers bachelor and master's degrees in the fields of corporate and tax law, dual master's degrees in the field of law, an LL.M. in International Business Law, and an Executive LL.M. in collaboration with Northwestern Pritzker School of Law, in addition to executive education programs. IE Law School's LL.M. programs are considered among the best in the world each year by the Financial Times.

www.ie.edu/law-school/

IE School of Science and Technology

IE School of Science and Technology, the major SciTech Hub in Europe, sets a new standard in STEM education and will shape a new profile of multi-disciplinary, impact-driven, technology leaders who are connected to the corporate world. The school bridges the gap between STEM research, tech companies, and entrepreneurs in the field of science and technology with innovative hands-on learning, high-impact research, and a practical multidisciplinary methodology.

The mission of IE School of Science and Technology is to educate and develop a new generation of directors with an international profile, equipping them to manage the challenges faced by companies,

governments, and society. This is achieved through new approaches to thinking and innovation based on the science of human behavior, driven by communication and the ability to fully leverage technology and information. IE School of Science and Technology offers degree, post-graduate, and executive education programs in fields such as big data, information management systems, market research, corporate communication, positive psychology, and leadership.

<https://www.ie.edu/school-science-technology/>

IE School of Architecture and Design

IE School of Architecture and Design places a special focus on excellence in design and innovation, coupled with an entrepreneurial spirit. The School promotes human creativity to build a more sustainable, just and beautiful world. IE School of Architecture and Design forms part of an institution which provides an overall learning process that considers other disciplines, particularly the humanities and other areas of knowledge required to successfully run a business. The School's program portfolio includes a Bachelor of Architecture, a Master of Architectural Management and Design, and a Master of Design for Work, Retail and Learning Environments.

Martin Varsavsky, CEO, Overture Life and Goggo Network, Founder and Chairman, Prelude Fertility (Argentina/Spain)

Dimitri Vassilacos, Partner, Ship Finance Solutions (Greece)

Zhihong Yi, Academic Director of FinTech MBA, Renmin University (China)

IE Tower, the new technological and sustainable headquarters of IE University in Madrid

THE WORLD IS OUR CAMPUS

IE University has offices in 28 countries and teaches its students in Madrid, Segovia, San Francisco, Los Angeles, Providence, Sao Paulo, Singapore, Cape Town, and Shanghai, among other cities. The institution is internationally recognized for its use of online and blended teaching methodologies that transform the learning experience.

IE University's campus currently extends across several buildings in the Salamanca financial district of Madrid. In September 2021, as part of our mission to promote education as the key to sustainable development, we inaugurated IE Tower, our new vertical headquarters in the north of the city.

Madrid is one of the world's leading cities for doing business, working, and investing.

By studying at IE University, our students have an unprecedented opportunity to establish contacts with multinationals, as well as to take advantage of all that this vibrant, cosmopolitan, cultural city has to offer.

IE University's campus in Segovia, where part of our bachelor programs are run, is housed in a 15th-century former convent. Segovia, which is a UNESCO World Heritage Site just 25 minutes from Madrid by high-speed train, is renowned for its historic monuments such as its Roman aqueduct and the Alcázar, a 15th-century castle. With its beautiful landscapes, IE's Segovia campus offers a unique setting where university students from over 100 countries enrich their educational experience by living in a city steeped in history and surrounded by nature.

Madrid

Ranked as the 12th largest economy in the world, Madrid is the epicenter of Spanish culture, business, and politics, offering excellent opportunities to conduct international business.

IE Tower, the new technological and sustainable campus in Madrid, joins four other high-rise buildings in a renowned business complex driving growth in northern Madrid.

Complemented by our prestigious Salamanca district campus, IE Tower reaffirms Madrid's position as a leading global educational hub.

At 180 meters high, with 35 floors covering 50,000 square meters and 7,000 square meters of green space, IE Tower can host 6,000 students in all of IE University's undergraduate programs.

One of the few high-rise university centers in the world, its design represents a benchmark for innovation and technology in education and it has been built with sustainability criteria and maximum energy efficiency in mind.

From its new headquarters at IE Tower, IE University also promotes urban and social transformation initiatives, energizes the capital's entrepreneurial ecosystem, and develops new collaborative projects with international companies.

www.ie.edu/university/about/study-in-madrid/

Whether studying in Madrid, Segovia, or online, IE University's focus remains the same: to help our students develop leadership excellence. This means combining classes with personalized assistance through individual learning solutions, one-to-one sessions, tutorials, coaching, and mentorship.

Studying in Madrid offers a stepping-stone to reach new contacts and opportunities across the continent and, thanks to a common language spoken by more than 500 million people around the world, the city is also considered a gateway to Latin America.

Students at the campus.

Campus Life helps students get the most out of their IE University experience.

STUDENT EXPERIENCE: CAMPUS LIFE, SPORTS & WELL-BEING

Life on IE University’s Segovia and Madrid campuses is vibrant, exciting and energizing. With over 8,000 students from 140 countries on campus, over 100 alumni clubs and a total of 1,500 annual events, there is something for everyone!

We believe wholeheartedly in creating a sense of community and promoting the development of personal and professional networks in the classroom. In addition, students are transformed when they take ownership of their IE University experience by leading and participating in events and extracurricular activities, taking advantage of the tools and resources available to them, and building meaningful connections with other members of our community.

The Student Experience team, comprised of Campus Life and Sports & Well-Being, strives constantly to ensure that students make the most of their IE experience.

Campus Life is the nexus of the IE University student experience. It works to help students enjoy their hobbies and discover new passions, build connections with each other, in-house teams, alumni and key contacts whose outreach goes beyond the IE community to support their education and bring their ideas to life.

IE Sports & Well-Being drives students’ personal transformation and encourages an active, healthy lifestyle. IE University promotes on-campus sports and outdoor adventures through a wide range of sporting activities, catering to different profiles.

Presentation of the book 'Philosophy Inc.: Applying Wisdom to Everyday Management, written by Santiago Íñiguez de Onzoño, Executive President of IE University

PUBLISHING

IE Editorial has extensive professional and multidisciplinary experience, which enables the knowledge created by the IE community – mainly faculty, but also alumni and current students – to be fostered and disseminated. In this sense, IE Editorial acts as a permanent foothold for IE authors' immense talent and supplies constant support throughout the whole editing process of their books, publications and reports. IE Editorial works closely with authors to transform their ideas into attractive, innovative and far-reaching projects, supporting them with translation, proofreading, design and layout services for the manuscripts' final publication.

IE Editorial is comprised of a team that operates transversally in IE, collaborating with all our centers and the institution's five schools to promote the involvement of the IE community in immersive, social and creative growth projects. Therefore, IE Editorial supports authors in the communication process, provides visibility, offers sales and promotion channels for their publications and organizes activities aligned with IE's purposes

and values, such as innovation, technologies, sustainability, diversity, arts and humanities, which makes the research developed available to and spread among wider audiences.

Another main task of IE Editorial is creating academic educational and innovative books to support every student. Such is the case of IE Liquid Pages, a collection of academic management content that combines the main theoretical knowledge of a wide range of areas from the best publishers worldwide and IE's cutting-edge learning materials, integrating tradition and the most innovative teaching methodology. This pioneering project has been created so students can broaden their knowledge of each area and design their own learning path, ensuring IE's educational excellence.

To reinforce the academic value of the works proposed, IE Editorial cooperates extensively and closely with the most prestigious publishing houses around the world. This ensures that the works of IE authors will have a major impact.

Soledad Atienza, Dean of IE Law School

FACULTY AND RESEARCH

Research at IE University is the outcome of the work of a multi-disciplinary group of scholars actively, creatively and productively committed to excellence and scientific rigor in their research projects, targeting both what the scientific community and the society demand from academic research, and centered on obtaining major academic and societal impact from their results. Their research output is also transformed into valuable, pioneering educational content for all the Schools at IE University through the diffusion of advanced research results in programs and syllabi.

Quality and innovation in research at IE University are also fostered by the participation of its faculty in international academic networks, in partnerships for scientific collaboration, in winning competitive bids for research funds, and in editorial, referee,

advisory and similar academic services, all of which strengthen scholars' expertise while broadening their scientific outlook.

IE University is committed to excellence in research and to being an international reference in knowledge creation in all areas of management, as evidenced by its faculty's contributions to academic and professional journals, books, case studies, and working papers, as well as its collaboration with companies to address real-life problems and the needs of corporations.

IE Foundation's Research Centers are looking to face the challenge of our constantly changing environment, to promote progress and the advancement of knowledge.

IE UNIVERSITY FACULTY

202 Full-time faculty

+1700 Part-time faculty

IE University professors are our academic triathletes:

- Produce rigorous research.
- Share their knowledge with the students.
- Work in close contact with the corporate world.

Pablo Isla, Chairman of IE University's International Advisory Board and former Executive Chairman of the Inditex Group, at Hay Festival Segovia

IE FOUNDATION

Social responsibility is key at IE University. For this reason, IE Foundation was created in 1997 with the aim, in the words of its President, Diego del Alcázar y Silvela, to “put into practice all the necessary actions to contribute effectively to business development and, in particular, to favor the less privileged sectors of society by promoting the incorporation of young people into the business world.” Since then, IE Foundation has been working to enhance the social impact of IE University by sharing its resources and collaborating with strategic partners.

Since it was founded over 20 years ago, IE Foundation, supported by its community of donors, has focused on achieving this vision, extending its outreach to other areas and actively promoting the values of the institution: entrepreneurship, diversity, inclusion and innovation.

IE Foundation currently works globally with scholarship programs that impact candidates from more than 100 nationalities and it is involved in collaborative projects in different regions around the world. Its resources are mainly dedicated to funding scholarships for highly talented people, research and knowledge generation projects that add value to the academic community and society in general, and to sponsoring initiatives that foster a culture of social awareness and community engagement.

Throughout its history, IE Foundation has strived to achieve these goals, funding thousands of scholarships that provide talented students with access to the education and opportunities they deserve, and supporting research on issues of diversity, globalization, gender equality, entrepreneurship, sustainability and social innovation.

IE Foundation strives to ensure that all members of the IE community have equal opportunities for personal and professional growth and can make their own contribution to social progress, maintaining a strong commitment to social engagement and the humanities.

In 2022, IE Foundation, together with IE University, awarded more than €23 million in scholarships to outstanding students from 124 nationalities, with a clear commitment to gender equality (57% of scholarships awarded in the last five years have gone to women). It has also developed and fostered knowledge by way of its 12 centers of excellence, its 6 chairs and observatories, and its more than 20 research projects.

IE Foundation recently hosted the IE Annual Giving Week, an event dedicated to raising awareness of the transformational impact of Giving Back to IE Talent and the ongoing effort to grow the scholarship funds.

STUDENT SERVICES

The Student Services department assists all IE University students. Our mission is to support our students in non-academic matters such as visas and relocation processes, making the students' transition to life in Spain as smooth as possible. It is important for us to help students adjust to their new living environment and we gladly provide information regarding:

- Visas and residence cards
- NIE cards and Certificate of Registration for EU/EEA/Swiss citizens
- Accommodation resources and housing-related services
- Medical insurance
- Bank accounts
- Mobile phone and Wi-Fi plans

TALENT AND CAREERS

Our goal is your success

Who we are

The Talent and Careers team is made up of over 50 experts who work hard every day to fast-track the careers of IE students and graduates. This is achieved by promoting synergies between the IE community, the business world and other organizations.

Our mission

The Talent and Careers team strengthens students' profiles to help them successfully pursue their professional careers. In addition, we partner with a wide range of companies and organizations from around the world and identify the best talent for their teams.

As a result, the international media rate the employability of our graduates very highly. Our university is ranked 19th in the world in the Times Higher Education Global Employability Ranking, which brings together the opinions of international recruiters. This ranking reflects the growing interest of multinationals in hiring profiles with solid technological knowledge and specialized skills to tackle today's business challenges.

Professional development training

We manage the design and organization of academic content for career development and fast-tracking. Our goal is to strengthen student profiles so that they are better positioned in the competitive job market.

Career guidance

We help students and alumni to identify their career opportunities, and to devise, plan and deliver on their career strategy.

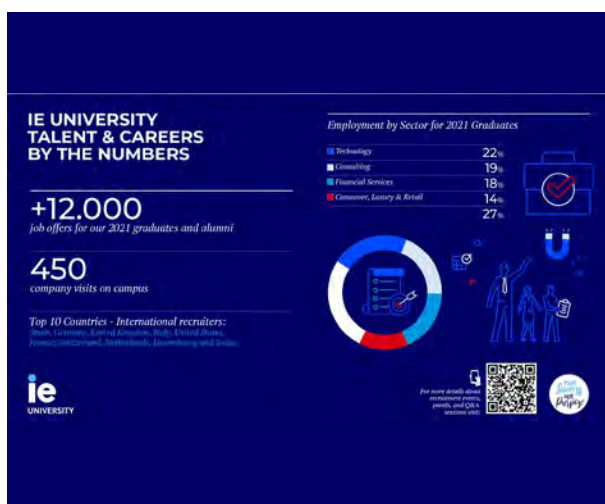

In addition, we provide them with resources on how to manage their professional development.

Partnerships with recruiters

We partner with a strong network of international recruiters and organizations. Together we identify the best talent to tackle the challenges facing each company and each industry, in a constantly changing world. We work closely with IE University's 28 international offices, which help to strengthen contacts with recruiters in different regions around the world.

In addition, we regularly organize on-campus and online events, company presentations and job fairs to promote contact between students and employers and to boost their employability.

IE Exponential Learning provides management development tools to boost the careers of executives from different industries and functional areas with a continuous learning mindset.

EXECUTIVE EDUCATION

Our Executive Education programs, which are based on the knowledge and experience of IE Business School, IE School of Science and Technology, and IE Law School, offer a transformative, growth-oriented experience for participants and their organizations. Our goal is for our students to broaden their vision, boost their leadership, and make a positive impact in a highly demanding and changing society.

We accompany managers and entrepreneurs throughout their careers, providing them with cutting-edge, innovative and disruptive management tools they can confidently use to address the challenges they face and to successfully perform in their respective areas of responsibility.

Our programs focus on the mindset and attitude of the participants toward learning, encouraging them to be flexible and to embrace the idea of continuous learning and personal growth. All our programs are offered in hybrid, face-to-face, and online formats, so that students can attend in the classroom or remotely.

www.ie.edu/exponential-learning/

General management programs

General management programs provide senior executives with the opportunity to develop a strategic vision, update their knowledge of the latest trends in business management, maximize leadership skills and successfully meet professional challenges. Our programs have a direct impact on the development of participants' management careers.

Sector-specific programs

Our sector-specific programs offer a key opportunity to update on the latest management trends in a sector that either covers its entire value chain or focuses on a specific, highly topical aspect. These programs also offer access to a valuable professional network for those who want to develop their career in a specific industry.

Lee Newman, Dean of IE Business School, at the IE Tower

Specialized programs

Specialized programs provide an immersion in different areas of management, with an innovative approach that combines IE Business School's faculty with professionals from leading companies. Our methodology provides practical learning that enables participants to design a roadmap applicable to the particularities of their own organization, as well as opportunities for networking enriched by the range of companies and industries taking part in the various programs.

IE University Corporate Relations

Through a range of senior management initiatives, master's degrees, MBAs, and bootcamps, as well as online and customized programs, IE Corporate Relations offers a selection of innovative talent development solutions. We align our training capabilities with the specific needs of organizations to strengthen their leadership as they adapt to a complex, ever-changing business environment. We develop skills for leaders to promote innovation and change within their companies, nurturing their entrepreneurial mindset in pursuit of a more sustainable and profitable future for all.

Global Alumni Weekend.

ALUMNI

Global Alumni Relations is dedicated to supporting over 75,000 graduate and post-graduate alumni across more than 182 countries, representing five schools: IE Business School, IE Law School, IE School of Architecture and Design, IE School of Politics, Economics and Global Affairs, and IE School of Science and Technology.

Our main goal is to provide value-added services, tools, and other helpful resources that enable our alumni to excel in their professional and personal lives. IE Alumni continue as lifetime community members and can access a wide array of benefits including exclusive ongoing education, career resources, and networking opportunities.

Our IE Alumni network offers countless opportunities for community members to get involved and make an impact.

The channels open to alumni to keep in contact with the IE community include:

- Over 300 worldwide events annually, available online and in person.

- A network of over 80 professional and geographical clubs.

- Our digital engagement platform “IE Connects” through which alumni can network with other IE community members and access their benefits.

- Resources to stay in touch such as the alumni website, social networks, newsletters, career services, and much more.
